

## **Final Symposium**

1. Date: Wednesday, November 26, 2008

2. Venue: Convention Hall, Institute of Industrial Science, the University of Tokyo

3. Program:

**13:10-13:20** Opening Remarks  
Kazuyuki Aihara (Research Director)

Part 1: Invited Talks (Language: English)

**13:20-13:50** Network of threshold coupled chaotic neurons and its applications  
Manish Dev Shrimali (LNMIIT)

**13:50-14:20** Effects of multiple parameter variations on biological system behaviors  
Ruiqi Wang (Shanghai University)

**14:20-14:50** Computational approaches to biosonar  
James Simmons (Brown University)

**14:50-15:10** Coffee Break

Part 2: Research Results of Aihara Complexity Modelling Project (Language: Japanese)

**15:10-15:40** Development of Bifurcation Analyses Software  
Shigeki Tsuji (Researcher, Complexity Theory Group)

**15:40-16:20** Results of Complex Bioinformatics Group  
Luonan Chen (Group Leader, Complex Bioinformatics Group)

**16:20-17:00** Results of Complex Computation Group  
Yoshihiko Horio (Group Leader, Complex Computation Group)

**17:00-17:10** Closing Remarks  
Kazuyuki Aihara (Research Director)

**17:20-** Banquet (at Foyer)  
Fee: 2,000 yen (Payable at the site)

Registration and Contact:

Aihara Complexity Modelling Project, ERATO, JST
